

Little Star and the Secret Suit

A fairy tale for those who shine extra bright

Little Star and the Secret Suit

PART 1 THE HOME AMONG THE STARS

Far, far away, where the night is never dark, exists the Great Light. That is where Little Star lived. All were one. No one was alone.
It was warm and felt like an endless embrace.

One day, Little Star saw that planet Earth had lost its glow. It needed help to shine again. "I'll go!" Little Star said bravely. The Master of Light smiled and handed over a secret Golden Egg.

"This is your power," he whispered. "Never forget it."

PART 2 THE ARRIVAL AND THE STRANGE SUIT

Swish! Down through time and space. To live on Earth, Little Star had to put on an Earth-suit. We call it "the body."

But the suit was strange! It was itchy and felt tight. Little Star's light was so strong it almost burned inside. And Earth was so noisy! Little Star had super-ears and super-eyes that saw everything.

At night, Little Star longed for home. They saw things the adults didn't. Sometimes there were grey mists in the corners that felt sad. But sometimes they also saw friends from home – the small blue orbs of light waving goodnight.

PART 3 FINDING THE "ON" BUTTON

Little Star thought something was wrong with the suit. Why did it hurt? Why did everything feel so much? They tried to turn off their light to fit in.
Then everything just became dark and heavy.

But one night, Little Star remembered the Golden Egg! There was nothing wrong with the suit. It was just a super-advanced receiver!

"I am not broken," Little Star thought. "I am a Night Watcher!"

PART 4 THE NIGHT WATCHER'S MISSION

Now Little Star understood their mission. When others were afraid or angry, Little Star didn't need to do anything but stand still, activate their Golden protection, and shine. They were like a magical tuning fork that made the false noise sound beautiful again.

Little Star was never alone. The network of light was always there. They helped those who were traveling back to the Great Light to find the way.

Do you also feel that your suit is itchy sometimes? Do you see things that others don't see? Then you are probably also a Night Watcher from the stars. You are not wrong. You are just very, very bright.

Welcome here!

To the one reading this,

This fairy tale came to me from a place of pure light, and therefore it is my deepest truth that it shall remain exactly that: free, open, and endlessly accessible. To put a price tag on this light would be to lock the energy inside old, sluggish systems. My purpose is to allow the frequency of truth to flow freely and unhindered to the nodes that are ready to receive it.

I have chosen to make this book completely free to download and share because my goal is not to collect money, but to reach the children and adults who need these words the most. There are many little "Little Stars" out there who carry immense power, yet feel that their Earth-suit is itchy and that the noise on this planet is overwhelming. I want them to know that they are Night Watchers. They are never wrong, and they are not broken. They are perfect exactly as they are, with their unique vibration, fully ready to transform the fear around them.

If this book helped you or your child remember your own Golden Egg and your true power, I ask only one thing of you: let the energy keep flowing. Pass the book on. Share it with a friend, a school, a preschool, or someone you know who shines a little extra bright, but who sometimes forgets how to find the On-button.

Let us help each other break through the noise and make the world beautiful again.

With warmth, light, and sovereignty, **Linda** (*Operator MZ026X | Kin 139*)
